CALIBRATION & VERIFICATION

Ensure precision and compliance with ISO-certified calibration services. TriNova's expert technicians provide on-site or laboratory calibration for flow, level, pressure, temperature, gas analysis, and fire & gas detection all performed to NIST, ISO17025, and A2LA standards.

START-UP & COMMISSIONING

Seamlessly integrate and optimize new equipment with TriNova's start-up and commissioning services. Our technicians handle I/O checkout, loop tuning, functional verification, and operational fine-tuning, ensuring a smooth transition from installation to production.

TURNAROUND & OUTAGE SUPPORT

During planned shutdowns, TriNova provides expert outage support, including shutdown planning, SIL testing, valve stroke testing, instrument loop checks, and interlock verification. Our team works efficiently to minimize downtime and restore operations quickly.

EMBEDDED TECHNICIANS

Need on-site expertise without increasing headcount? TriNova's embedded technicians provide dedicated support for daily operations, troubleshooting, calibration, and process optimization, ensuring continuous reliability and efficiency at your facility.

ENGINEERED PROCESS SOLUTIONS

From turnkey skid systems to custom-engineered automation solutions, TriNova provides design, fabrication, and commissioning support that ensures your process runs at peak efficiency. Our engineered solutions include chemical dosing skids, batch systems, custom panels, and complete control system integration, designed and built with your unique operational needs in mind.

ARTIFICIALLY INTELLIGENT CONTROLS

Process control challenges are frustrating and costly. With the Koios artificial intelligent controls platform installed on your existing control systems, they don't have to be.
This on-premise, hardware agnostic system built by true control system experts allows for real-time optimization of your processes.

Improve Process Efficiency | Conserve Resources | Expand Equipment Life | Impact Health & Safety

TECHNICAL EDUCATION

TriNova's IACET-accredited training programs deliver hands-on technical education backed by real-world application. With live Process Training Units (PTUs) and expert-led coursework in instrumentation, calibration, and troubleshooting, we ensure your workforce is skilled, compliant, and prepared for the future.
